What Is Dilaudid (Hydromorphone) 2mg?

Dilaudid, also known by its generic name **Hydromorphone**, is a powerful opioid analgesic designed for **moderate to severe pain** that doesn't respond well to other medications. The 2mg strength is widely prescribed for patients needing effective pain management with rapid onset.

Dilaudid works by:

- Acting on the central nervous system
- Reducing pain signals
- Creating a calming, pain-relieving effect

- Offering quick relief, often within minutes

Because it is **stronger than morphine**, Dilaudid is preferred for patients recovering from trauma, post-operative pain, or chronic pain conditions that require reliable relief.
