What is Phentermine and How Does it Work?

Phentermine is a prescription stimulant used for short-term weight management. It works by suppressing appetite and increasing energy levels, helping individuals reduce caloric intake and maintain motivation for a healthy lifestyle.

Phentermine is most effective when combined with:

- **A calorie-controlled diet**
- **Regular physical activity**
- **Behavioral lifestyle changes**

This makes it an ideal tool for individuals struggling with obesity or weight-related medical issues, such as high cholesterol, high blood pressure, or diabetes.
