## **What is Tramadol and How Does It Work?**

Tramadol is an opioid analgesic used to treat moderate to moderately severe pain. It works by interacting with the central nervous system to reduce pain perception and provide effective relief.

Common uses include:

- Chronic back or joint pain
- Post-surgical pain relief
- Injury-related pain
- Nerve or migraine pain

At MedsFedEx.com, both Tramadol 50mg and Tramadol ER (Extended Release) are available for overnight delivery, giving you the flexibility to select the right formulation for your needs.
