Important Information Regarding Gabapentin

Gabapentin is a prescription medication used to treat certain types of seizures, nerve pain (postherpetic neuralgia), and restless legs syndrome. It is only legally available with a **valid prescription** from a licensed healthcare provider.

Purchasing Gabapentin without a prescription, especially from unverified online sources, poses significant health and legal risks.

Risks of Buying Gabapentin Without a Prescription Online

- **Counterfeit or Dangerous Products:** Medications from unverified online sources may be counterfeit, contaminated, or contain incorrect, dangerous, or no active ingredients. This can put your health and life at serious risk.
- **Misuse and Dependence:** Gabapentin carries risks of misuse, dependence, and withdrawal symptoms if stopped suddenly. Misusing it, particularly by combining it with other

depressants like opioids or alcohol, significantly increases the risk of **life-threatening respiratory depression (slowed or stopped breathing)** and overdose.

- **Serious Side Effects:** Gabapentin can cause side effects like drowsiness, dizziness, loss of coordination, and more serious reactions. A healthcare professional needs to monitor you for these and for potential drug interactions.
- **Legal Consequences:** In the United States, while not federally controlled, many states have classified Gabapentin as a **Schedule V controlled substance** due to rising misuse. Buying it without a prescription may violate state laws.

How to Safely and Legally Obtain Gabapentin

The safe and legal way to get Gabapentin is to **consult a licensed healthcare professional**.

1. **Schedule an Appointment:** Talk to your doctor, or a specialist like a neurologist or pain specialist, about your medical condition.
2. **Receive a Prescription:** If the doctor determines Gabapentin is the appropriate and safe treatment for you, they will write a prescription.
3. **Fill the Prescription:** Take the valid prescription to a licensed and reputable pharmacy (local or online) to be filled.
