What Is Dilaudid?

Dilaudid, the brand name for **Hydromorphone**, is a potent opioid analgesic designed for the management of **moderate to severe pain**. It's commonly prescribed after surgeries, for chronic pain conditions, and in cases where other painkillers (like oxycodone or morphine) are insufficient.

How Dilaudid Works

3. Acute Pain Episodes

Its **rapid onset** and **short half-life** make Dilaudid ideal for emergency situations where instant relief is essential.
