What is Hydrocodone?

Hydrocodone is an opioid-based prescription medication used for **pain relief and cough suppression**. It works by acting on the central nervous system to change how the body perceives pain.

Key Benefits of Hydrocodone:

- Provides relief from moderate to severe pain.
- Helps with post-surgery recovery, chronic back pain, or injury-related discomfort.
- Available in various forms and dosages for personalized treatment.

Important Note: Hydrocodone should be used strictly under medical supervision to prevent dependency, misuse, or adverse effects.
